

DUKE SCHOOL OF MEDICINE/DUKE-NUS

Parkinson's Disease and Neurodegeneration Symposia:

A global, multidisciplinary translational meeting to foster collaborations in order to improve our knowledge and treatment of this disease.

April 30 – May 1, 2018

Washington Duke Inn and Golf Club
President's Ballroom 1

Opening remarks - Mary Klotman, MD, Dean, Duke University School of Medicine - April 30, 1:15 p.m.

Keynote - Al La Spada, MD, PhD, Duke Department of Neurology - Current pathways in Neurodegeneration: From polyglutamine disease targets to broad-based therapeutic opportunities - May 1, 1-1:30 p.m.

Session 1: Su-Chun Zhang, MD, PhD, Duke NUS Medical School - Genetics, etiology and biomarkers in Parkinson's disease - April 30, 1:30 p.m.

Session 2: Daniel Laskowitz, MD, MHS, Duke Department of Neurology - Molecules to Function: Impact for Neurodegeneration - April 30, 3:20 p.m.

Session 3: Laurie Sanders, PhD, Duke Department of Neurology - Cutting-edge therapeutics for Parkinson's Disease - May 1, 9:30 a.m.

Session 4: Edward Levin, PhD, Duke Department of Psychiatry and Behavioral Sciences - Environment and non-neuronal contributors to neurodegenerative disease - May 1, 1:30 p.m.

Session 5: Omit Chiba-Falek, PhD, Duke Department of Neurology - Modeling and underlying pathogenic disease mechanisms - May 1, 3:45 p.m.

RSVP: krista.hunt@duke.edu
