December 10, 2020

To Whom It May Concern,

As you are aware, there is a curfew in place for all North Carolina residents and businesses due to a surge in COVID-19 cases. This order is consistent with the actions and policies that Duke has undertaken over the past several months to prevent the spread of COVID-19 in our community and protect our health care workers, hospitals and clinics so they can continue their vital service.

At this time, our faculty and staff currently support critical operations. This letter serves as confirmation that our healthcare workers should be permitted to report to their designated work location as scheduled until further notice.

We appreciate your support and partnership to support our community during this time.

Sincerely,

Duke Health Leadership
