Growing the pie – diversifying funding portfolios

The Office for Faculty Mentoring is offering the “Growing the Pie” Seminar Series, a collection of resources to help faculty diversify their funding portfolios. This fall, hear from leaders at the Duke Medicine Development Office and NC Biotech to learn about how their offices can support your research endeavors. Click to get more information or to register for Major Gifts Breakfast Break (Thursday, 9/3 from 9-10) or the NC Biotech Funding Coffee Break (Wednesday, 9/30 from 2-3).

CITI training sign-on just got easier

Duke Medicine users are now able to log into CITI using Shibboleth Sign-On interface. Users are encouraged to use their Duke Net ID rather than creating a separate CITI user name and password. Duke Medicine CITI learner profiles have been matched to Duke Net IDs and the CITI Program has updated its home page to include a single sign on (SSO) link inviting learners to use the feature. Log into CITI Program and locate the SSO button to access your account.

CTQA becomes HSRC

Effective July 1, the Duke University Compliance Program changed name of the Clinical Trials Quality Assurance (CTQA) section to the Human Subject Research Compliance (HSRC) section. The new title will more accurately reflect the scope of the work performed by this section of the Office of Audit, Risk and Compliance, as the group works with teams conducting both clinical trials and behavioral studies. HSRC will continue to operate under the same work plan and procedures that existed prior to the name change.
