CTSA Virtual Town Hall January 12, 2016

Learn more about how Duke CTSA Regulatory Affairs expertise has helped research move forward at Duke – and how it can help you. Case studies by Dr. Daniel Laskowitz, Dr. Joanne Kurtzberg, and Research Scientist Shara Reihani. Login information and the opportunity to submit questions at www.dtmi.duke.edu/townhall

MEDx Call for Pratt/SOM Proposals for Pilot Research Proposals

MEDx is a new entity at Duke created to enhance existing ties and foster new collaborations between the School of Medicine and Pratt School of Engineering. An award of $50,000 will go to each of 6 successful proposals. More details available at https://entrepreneurship.duke.edu/

Duke’s MURDOCK Study Offers Capabilities to Accelerate Research for Collaborators

The MURDOCK study is a longitudinal study being conducted by the Duke Translational Research Institute. Under the leadership of L. Kristin Newby, MD, MHS, Principal Investigator, the study has entered a new phase of collaboration and can offer collaborators access to biological samples and potential study participants. To collaborate with the MURDOCK Study, visit http://www.murdock-study.org/ or go to murdock-study@duke.edu or 704-250-5861.
