Office of Physician-Scientist Development Seminar Series
Basic Research Training Program

The Basic Research Training Program Seminar Series will delve into the importance of best practices and standards in laboratory-based research, discuss appropriate documentation of experiments, typical laboratory methodologies and explain the context in which they are used. This series will also appraise research questions, identify appropriate methodologies to use, demonstrate effective use of laboratory techniques, as well as how to interpret data resulting from various techniques and processes.

March 13, 2019
“Best Practices at the Bench: Part 1”
Dr. Michael Dee Gunn, MD Professor of Medicine and Immunology Associate Professor in Pathology
Room 001 MSRBI

April 10, 2019
“Best Practices at the Bench: Part 2”
Dr. Michael Dee Gunn, MD Professor of Medicine and Immunology Associate Professor in Pathology
Room 2001 Duke North Hospital

May 8, 2019
“Lab Scientists Toolbox”
Dr. Michael Dee Gunn, MD Professor of Medicine and Immunology Associate Professor in Pathology
001 MSRBI

June 12, 2019
“Validation of Reagents”
Dr. Christopher Holley, MD, PhD Assistant Professor of Medicine and Assistant Research Professor of Molecular Genetics & Microbiology
001 MSRBI
