CHAIR OF THE DEPARTMENT OF MEDICINE

Duke University School of Medicine invites applications and nominations for the Chair of the Department of Medicine. Candidates should have a strong background in academic medicine, including a track record of excellence in clinical service, medical education, and research, along with significant experience as a physician leader in an academic setting.

Duke’s Department of Medicine has an established tradition of cutting-edge clinical care, nationally recognized programs in graduate medical education, and innovative clinical and translational research. The Department’s large research portfolio spans basic discovery to clinical trials to population health and includes productive collaborative efforts with other departments, centers and institutes across the school and university. The undergraduate and graduate medical training programs foster excellence, leadership and scholarship at every level. Approximately 650 clinical and research faculty members, and 270 fellows and residents comprise the department.

Duke University School of Medicine is among the top medical schools in the country, ranked in the top 10 for funding from the National Institutes of Health and by U.S. News and World Report. The signature clinical facility of the Duke University Health System is Duke University Hospital, a Magnet hospital.

Candidates should have an MD degree, academic credentials that qualify for appointment at the level of full Professor, and be eligible for a license to practice medicine in North Carolina. Duke University School of Medicine and Health System are very interested in having a diverse candidate pool and would be particularly interested in women and those from other groups underrepresented in medicine.

Duke University is an Equal Opportunity/Affirmative Action Employer.

Interested individuals should submit a statement of interest and a Curriculum Vitae to Paige Smith via email at paige.smith@duke.edu by June 1, 2017.
