Speed Science 2016 – Where the Elite Meet

Speed Science provides an opportunity for clinical/translational investigators and computational researchers to meet and develop collaborations by sharing research interests, expertise, or collaborative needs in 5-minute “speed-dating” presentations to the group. The session will be Friday, April 22, 11:00a - 1:00p in Duke Medicine Pavilion, Room 2W93. To register, please complete the [registration form by Friday, April 1, 2016](#). Pizza will be provided.

Human Physiology Testing Core Services Available for Clinical Research Investigators

The Human Physiology Testing (HPT) Core is a research support service offering clinical procedures related to the biochemical and physical functions of the human body. Additional information, including a [full list of services available](#) can be found on the [HPT Core website](#).

Faculty input needed in development of MyResearchHome portal

The CTSA is funding the development of the MyResearchHome portal, designed to facilitate research activities for researchers and their staff across Duke. For the portal to be of the greatest use, faculty input is essential. If you are interested in providing opinions (via email demos or in focus groups) please contact [rebecca.brouwer@duke.edu](mailto:rebecca.brouwer@duke.edu) or [myresearchhome@dm.duke.edu](mailto:myresearchhome@dm.duke.edu).
