- Differentiate yourself in the Residency process.
- For more information: mmci.duke.edu or mmci@duke.edu

Jeff Farranti, MD, MS
VP and Chief
Information Officer
Duke Health

"IT impacts every aspect of modern healthcare delivery. Clinicians that can fully leverage technology to improve the cost, quality, and effectiveness of care are rare and valuable assets in modern health systems.

MMCI is the best program in the country for training clinical informaticians to tackle the most vexing problems in healthcare."

"MMCI gave me the knowledge and tools necessary to seek opportunities to expand my scope of practice beyond one-on-one patient encounters. Residency

programs were very interested in my informatics background and the skills that I would bring with me. Anyone seeking to have an impact on the future of healthcare and healthcare delivery should explore the opportunities offered by this program."

Andrew Yazman MD Class of 2020
